

## Required Configurations for Using SURF in SLRI Registration Mode

In order to get optimum use of the SURF application, please take into account the following material and software configurations:

### Material Configuration:

- Computer with a 1 GHz processor or more and 128MB of RAM
- DirectX 9 or higher version
- Minimum screen resolution of 800 x 600 (Recommended resolution of 1024 x 768 or higher)
- Intermediate Internet connection (minimum)
- Wireless Network speed of 100 Mb/s (minimum)
- Electronic signature from the Chambre des notaires du Québec (Entrust profile)
- MRN customer account (Land register customer number)

### Software Configuration:

- 1) One of the following Windows operating systems:
  - Windows 7
  - Windows 8
  - Windows 10
  - Windows Server 2008 (client-server or terminal server supported)
  - Windows Server 2012 (client-server or terminal server supported)
  - Windows Server 2016 (client-server or terminal server supported)

#### Specifics (Operating System):

For Windows 7 or higher versions, if the User Account Control (UAC) is deactivated, the user must be the administrator of the account. If the UAC is activated, the user rights are sufficient.

- 2) One of the following Microsoft Word versions:
  - 2010 (32 or 64 bits)
  - 2013 (32 or 64 bits)
  - 2016 (32 or 64 bits) excluding version 365
- 3) Notarius Entrust application (preferably installed before the SURF installation process, but can also be installed at the same time or after).
- 4) One of the following Adobe Reader versions: 9, 10, 11 and DC.
- 5) Also, when deploying your SURF application, the following components will be installed:

- Microsoft Silverlight (version 5)
- .NET Framework 4.0
- PDF995
- Ineterop.VBA.dll in the "%programfiles%/SURF/" folder
- JBETSign.dll in the "%programfiles%/SURF/" folder
- Log4net.dll in the "%programfiles%/SURF/" folder
- SerialValidation.Contract.dll.dll in the "%programfiles%/SURF/" folder
- Syncfusion.Compression.Base.dll in the "%programfiles%/SURF/" folder
- Syncfusion.Core.dll in the "%programfiles%/SURF/" folder
- Syncfusion.DLS.Base.dll in the "%programfiles%/SURF/" folder
- Syncfusion.DocIO.Base.dll in the "%programfiles%/SURF/" folder
- Syncfusion.DocIO.Windows.dll in the "%programfiles%/SURF/" folder
- NetLib.SLRI.resources.dll in the "%programfiles%/SURF/en" folder
- NetLib.Controls.dll in the "%programfiles%/SURF/" folder
- NetLib.SLRI.dll.config in the "%programfiles%/SURF/" folder
- NetLib.SLRI.dll in the "%programfiles%/SURF/" folder
- SURF.SLRI.Com.dll (save required) in the "%programfiles%/SURF/" folder
- The SURFCom.dll file (save required) in the system32 folder
- The required Word macro based on the Word version used

### **SURF Registration**

First, the user must register and provide professional information on the SURF Portal (professional address, city of practice, Land register customer number and invoicing address). The registration must be approved by ACCEO Solutions before starting to use SURF. However, the user does not have to wait for this approval before installing the application.
